

The complete solution for commercial and industrial environments...

**SYSTEM** **UVEX**

Energy efficient water management from System Uvex, *naturally.*

## System Uvex Ltd

System Uvex specialise in the design, supply, installation and maintenance of bespoke water management systems.

Established in 1988 System Uvex has considered the environmental impact of its products and services long before it was politically correct to do so.

Two decades later our aims remain:-

- To promote commercial and industrial water management solutions that have a minimal effect on the environment
- To encourage industry and commerce to recognise and respond to the value of the conservation of natural resources so that together we can build a more sustainable future
- To provide clients with a responsive service, giving peace of mind and an assurance that our technical expertise means you no longer have to worry about water management.

*System Uvex - a partner you can trust*

## Use System Uvex to benefit from:-

- A bespoke integrated solution driven by your needs
- Reduced energy costs
- Reduced water treatment costs - the use of corrosion resistant materials and high quality rainwater means the water used requires less treatment
- A reliable cost effective and “greener” option than chemical water treatment
- A positive effect on the environment with conservation of both water and energy
- Lower whole life-cycle costs – short payback, low operating costs, low maintenance costs, lower energy usage, availability of financial incentives from the government.

## Client installations include:

Alfred MacAlpine  
Booker Ltd  
Canary Wharf  
City of Westminster  
GCHQ  
The Home Office  
J Sainsbury plc  
Jaguar Cars Ltd  
Land Rover

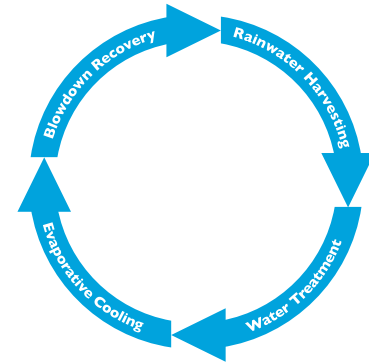

National Assembly for Wales  
National Maritime Museum  
National Science Museum  
New Scotland Yard  
Palace of Westminster  
Tesco Plc  
University of Southampton  
McLaren Mercedes  
Whole Foods, Kensington

## A unique non-chemical water management package:

System Uvex is redefining the boundaries of recycling water within the commercial and industrial markets. Each element of the System Uvex water management system has been carefully designed to maximise the potential for recycling as well as being energy efficient, cost effective and environmentally friendly.

- **Evaporative Cooling** utilising stainless steel cooling towers equipped with low noise, low energy absorbing fans
- **Rainwater Harvesting** capturing and recycling a natural, high quality and free resource for make up purposes
- **UV Water Treatment** a tried and tested, easy to use, compliant non-chemical microbiological alternative to ensure the water used is safe
- **Blowdown Recovery** for cost effective recovery of essential waste water.

"Excellent" BREEAM Rating

### The Senedd - National Assembly for Wales building.

System Uvex installed a rainwater harvesting system in the Senedd. The design objectives for this landmark building were to meet and exceed the Assembly's constitutional requirements for sustainable development and current good practice. This included the need to minimise energy consumption and waste. Rainwater harvesting contributes towards this aim.
